

Partner search for 1st Interreg Danube call 2021-27

GeotermiKA Ltd is looking for partners to apply to INTERREG DANUBE 1st call of the programme 2021-2027

About GeotermiKA. It was established in 2018. for the purpose of research and exploitation of geothermal water for the needs of the existing heat system and for the production of electricity for the needs of public facilities of the city (hospitals, schools, kindergartens, city administration facilities, public lighting...). Given the location and existence of the central heat system in Karlovac, the use of geothermal water for thermal purposes would be in the public interest and would primarily benefit citizens.

Project Priority 2- A greener low carbon Danube region

Project description: Further development of preparation and research of the geotermic potential in Karlovac for heating, several of activities for the project/
partnership: Preparation of Project-technical documentation for the construction of the 2nd injection well and Project-technical documentation for the construction of the geothermal energy plant for electricity / thermal production such as:

- Decision/permit on the acceptability of 2nd injection well construction project for the environment and nature,
- Project-technical documentation for the construction of the geothermal energy plant for electricity / thermal production (conceptual design, main design)
- Equipment for field and construction monitoring.

Please contact: direktor@geotermika.hr by 5th November
