

LeapSpace

LeapSpace: AI that empowers researchers

Responsible AI, supporting
research excellence

LeapSpace™ is Elsevier's next-generation AI-assisted research workspace. Developed and tested with the global research community, it is designed to help researchers move faster from ideation to impact while safeguarding research integrity, transparency, and trust.

Why choose LeapSpace

- **Comprehensive, publisher-neutral insights**, uniting abstracts and full text from trusted scholarly sources across disciplines
- **Rigorous standards for transparency**, including linked citations and Trust Cards that explain why sources were cited and highlight contradictions

- **Human oversight throughout**, with experts involved in content curation, model evaluation, and validation
- **Broader workflow coverage** across research tasks in one workspace
- **AI designed to reinforce human research skills** by highlighting perspectives and evidence
- **Security and privacy practices** at institutional and individual levels

See LeapSpace In Action

Join a live webinar to explore our research-grade AI workspace, featuring product insights, a live demo, and expert Q&A — built on trust, transparency, and security.

Tuesday, February 10, 2026 | LeapSpace Introduction Session (60 minutes)
